

INFOREC Association

The association for Promoting Education for Economic Informatics - **INFOREC** - is a non-profit, apolitical and non-governmental, founded in 1993 by members of the Department of Economic Informatics. The purpose of the association is to promote and support, through various forms, the economic informatics education, for which the following categories of activities are considered:

- organizing the International Conference of Economic Informatics;
- organizing and supporting scientific communications sessions and professional student competitions;
- editing a specialist Journal;
- award of mobility, documentation and research grants for teachers and students;
- initiating international exchange of software, publications and literature;
- organizing training of university staff in the field of economic informatics;
- attracting sponsors, coordinating and facilitating the financing of activities initiated by the association.

The accounts of the **INFOREC** Association are:
